FLUID MILK AND CREAM REPORT

JULY 1960

July 18, 1960

Prices of milk for fluid use in the United States during early July averaged higher than June both at producer and consumer levels, the Crop Reporting Board reports. Dealers' buying prices for fluid milk were higher in 47 markets or 1 in about every 3. Prices were lower in 3 markets. Single quart prices for milk delivered to homes were up in 33 markets but down in 2. Out-of-store single quarts were higher in 26 but lower in 3 markets. Half-gallons were up in 26 markets and gallon prices advanced in 9 markets. Lower multiple-quart container prices were reported: for half-gallons in 7 markets, for gallons in 2 markets. Producer prices in a number of markets are not currently determined and will be shown next month.

Prices of milk paid by dealers for fluid use (including negotiated premiums in Federal Order markets) in about 160 markets in early July averaged \$5.34 per hundredweight (3.5 percent fat). This was 16 cents above June and 7 cents above July 1959. Prices this month were 17 cents higher than the 1954-58 average for the month. Prices rose from June in all regions except the Mountain and Pacific which were unchanged. Compared with July 1959, dealers' buying prices increased in all regions except New England and the Pacific Coast which were unchanged and the Middle Atlantic which was lower.

Single quart prices for milk delivered to homes in 25 major markets throughout the United States in early July averaged 26.1 cents. This was 3 tenths of a cent above June and 6 tenths more than in July last year. This average was 2.4 cents per quart above the July average for the period 1954-58. Prices were one-half cent above June in Chicago and 1 cent higher in Boston, Hartford, Omaha, and Washington, D. C., 1 to 1½ cents higher in New York City, and 1 to 2 cents above June in Philadelphia.

Preliminary average daily sales of whole milk in 65 Federal Order and 6 State marketings areas during May were fractionally lower than in May last year. April sales of skim milk items were 8 percent above April 1959. Milk and cream mixture sales (half-and-half) averaged 5 percent higher than in April 1959 on an average daily basis. Sales of fluid cream items during April were 5 percent above April last year. Average daily sales of all fluid items (product-pound basis) during April were 3 percent greater than a year earlier. Receipts in 76 Federal Order and 5 State marketing areas (average daily basis) during May were up 5 percent from May last year. Receipts per producer were 7 percent above May 1959.

(pages 20-25)

PRICES IN FLUID MILK MARKETS, JULY 1960

In New England, the dealers' buying price of milk for fluid use in early July averaged \$6.03 per hundredweight. This was 45 cents higher than the June average, but the same as July last year. Maine markets reported the Class I price up 88 cents with home prices 1 cent per quart higher and store prices mostly unchanged. In New Hampshire, reported prices advanced 44 cents per hundredweight for Class I milk and 1 cent per quart to consumers. Vermont home and store prices were 1 cent per quart above the previous month. Class I prices are not currently determined in the Vermont markets reporting. In the Federal markets of Massachusetts, Rhode Island, and Connecticut, Class I prices were up 44 cents per hundredweight and consumer prices generally 1 cent per quart above June.

Middle Atlantic Class I prices during early July averaged \$5.94 per hundredweight -- 28 cents over June, but 8 cents under July a year ago. Class I prices in the New York-New Jersey marketing area were 34 cents per hundredweight higher. New York City and Northeastern New Jersey reported home delivery prices up from 1 to 1½ cents and store prices up a cent from June. Schenectady home delivery prices were unchanged but store prices were 1 cent per quart over last month. Other portions of the marketing area reported no change in prices. Philadelphia prices were higher by 40 cents per hundredweight to producers and 1 cent per quart to consumers.

Prices of milk for fluid use in the East North Central region in early July at \$4.40 per hundredweight increased 7 cents from June and were 33 cents above July 1959. Columbus, Ohio reported a decline of 17 cents per hundredweight in Class I prices with virtually no change in consumer prices. In Evansville, Ind., the only reported price change was in half-gallons which rose to previous levels following the end of a price war. In Chicago and closely related Federal markets, Class I prices were 20 cents per hundredweight higher. Selling prices were up from one half to 1 cent per quart in most markets. Green Bay, Wis., prices were unchanged, but half-gallon and gallon prices in Milwaukee were a cent higher. In Springfield, Ill., there was no change in producer prices but selling prices were up as much as 3 cents per quart following the end of a price war. Peoria, Ill., prices were mostly a cent per quart above June at home and stores. Consumer prices in Madison, Wis., were up about a cent per quart. Producer prices in these markets are not currently determined.

In the West North Central area, prices of fluid use milk in early July averaged \$4.26 per hundredweight. This is 14 cents above June and 9 cents above July a year earlier. In the Duluth-Superior, Minn.-Wis. markets, Class I prices were up 40 cents per hundredweight but consumer prices were unchanged. In the Minneapolis and St. Paul, Minn. markets, the Class I price jumped 37 cents per hundredweight but consumer prices were unchanged. Class I prices in Des Moines, Iowa advanced 20 cents per hundredweight, but selling prices to consumers were the same as June. In St. Louis, Mo., and nearby Alton, Ill., Class I prices were 18 cents per hundredweight above June. Consumer prices in St. Louis were unchanged, but Alton prices have not been reported. Springfield, Mo. reported a Class I price-increase of 11 cents per hundredweight, but no change in home and store prices. The Fargo-Moorhead, N.D.-Minn. market reported a 2-cent per

quart drop in home delivery prices and declines of as much as $2\frac{1}{2}$ cents out of stores. Prices of milk for fluid use in this market have not been reported. Grand Forks, N. D. Class I prices were unchanged but home delivery single quarts dropped 2 cents. Prices of milk delivered to homes and sold out of stores were 1 cent per quart above June in Omaha and Lincoln, Neb. Class I prices in these markets are not currently determined.

Class I prices in South Atlantic region markets averaged \$6.09 per hundredweight in early July, increasing 8 cents from June and 4 cents from July a year ago. Prices in Wilmington, Del were higher by 40 cents per hundredweight for Class I milk and 1 cent per quart to homes and at stores. Baltimore, Md. Class I prices increased 40 cents per hundredweight but consumer prices were unchanged. Washington, D. C. reported home delivery prices 1 cent per quart higher and store quarts $1\frac{1}{2}$ cents above June, but other prices unchanged. Miami, Fla. prices declined 14 cents per hundredweight for Class I milk, but there were no changes in consumer prices.

In the East South Central region, Class I prices at \$5.20 per hundredweight advanced 6 cents from June and were 19 cents over July last year. Paducah, Ky. reported a Class I price increase of 30 cents per hundredweight. Single quart home delivery prices were up 2 cents with store price increases of lesser amounts. Chattanooga, Tenn. reported some adjustment in consumer prices with lower half-gallon and higher gallon prices for milk out of stores. Memphis, Tenn. prices were up by 11 cents per hundredweight for Class I milk and 1 cent per quart for milk to consumers in most instances. Montgomery, Ala. Class I prices advanced 33 cents per hundredweight but home and store prices were unchanged.

West South Central fluid use prices averaged \$5.44 in early July -- 16 cents above June and 9 cents higher than July last year. Class I price increases reported in Arkansas were: Ft. Smith, 40 cents and Little Rock, 51 cents. Consumer prices reported in these markets, were virtually unchanged. New Orleans, La. Class I prices were up 20 cents and Shreveport, La. up 40 cents, with no change in home or store prices in either market. Austin and Dallas, Tex. Class I prices were 25 cents per hundredweight above June with no change in prices at consumer levels.

Class I prices in Mountain region markets averaged \$5.47 during early July -- the same as in June, but 3 cents above July 1959. Cheyenne, Wyo. reported no change in Class I prices but a 1-cent increase in home single quarts and gains up to 1 cent for milk sold out of stores.

On the Pacific Coast, Class I prices at \$5.19 per hundredweight were unchanged from June and about the same as July last year. Class I prices in Spokane, Wash. held about steady from June but all retail prices were 1 cent per quart higher with the exception of gallon store prices, which were unchanged. Portland and Salem, Ore. reported no change in producer prices but home delivery and store half-gallons advanced one-half cent per quart and store quarts 1 cent.

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, APRIL-MAY 1960

The addition of sales data for the State of California begins with this issue. These data are supplied by the California Crop and Livestock Reporting Service from records of the Bureau of Milk Stabilization of the State. The addition of the sales data for this State to the tables increases to 5 the number of entire States covered by whole milk sales. This group of 65 Federal and 6 State marketing areas represents about three-fifths of the nonfarm population of the United States.

Whole milk sales during May fractionally below last year

Preliminary average daily sales of whole milk in 65 Federal and 6 State marketing areas, at 73,289,000 pounds during May, were 4 percent below April. However, this was only slightly lower than the 73,585,000 pound average of May last year. Cumulative daily sales during the first five months of the year were 1 percent above the same period a year ago. The average milkfat test of whole milk sales in 65 of the 71 markets for April was 3.55 percent, as compared with 3.56 percent for both March 1960 and April 1959.

April skim milk sales 8 percent above 1959

Average daily sales of skim milk items in 67 of the 71 marketing areas during April were 3 percent higher than in March and 8 percent larger than a year earlier. Cumulative daily sales for this group of markets for January-April 1960 were 7 percent above the same period in 1959.

Half-and-half sales 5 percent over a year earlier

April sales of milk and cream mixtures (half-and-half in most markets) in 66 areas during April increased 1 percent from March and were 5 percent above April last year. Sales in California and Chicago, which together make up about half the total, were each 2 percent higher than April 1959. For the remaining markets, sales of mixtures were about the same as in March but 8 percent greater than in April a year ago. Cumulative daily sales of milk and cream mixtures for the first four months of 1960 were 4 percent above sales for the same period of 1959.

Sales of fluid cream 5 percent more than in April 1959

Average daily sales of fluid cream items during April in 66 marketing areas were 7 percent larger than in March and 5 percent above April a year ago. Cumulative sales January through April were 1 percent greater than the first 4-month total last year.

Total fluid product sales in April 3 percent over last year

Sales of all fluid products in product pounds in 69 marketing areas (average daily basis) during April were slightly lower than March but were 3 percent more than in April last year. Cumulative daily sales for the first four months of the year were 2 percent above the same period in 1959. The average test of April sales of all fluid items in 64 of the 69 markets was 3.69 percent. This compares with 3.69 percent in March and 3.70 in April a year ago.

Continued on page 27-

1/ Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas. Data reported in each comparison are for comparable areas. Previous year data revised, previous and current months preliminary. For a list of the markets combined in this table, see April 1960 report.
 2/ Federal market totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
 3/ Data comprise plant receipts of Grade A milk from State producers.

Compiled from reports of Market Administrators and State milk control agencies.

(Continued from page 20)

Receipts of milk during May up 5 percent from a year earlier

Total receipts of milk on an average daily basis during May in 76 Federal Order and 5 State marketing areas increased 6 percent from April and were 5 percent above May 1959. Receipts of 730 pounds per producer in this group of markets in May were 7 percent greater than both the previous month and May 1959. The average milkfat test of receipts in 78 of the 81 marketing areas (Connecticut and the Federal markets of New York and New Jersey excluded) was 3.68 percent in May, 3.69 in April and 3.65 percent in May last year.

Milk production continues 1 percent above 1959

Production of milk on farms in the United States during June, at 12.1 billion pounds, was 1 percent more than in June last year. This is 4 percent below the May output and 1 percent less than the 1949-58 June average. For the first half of the year, milk production totaled 66.5 billion pounds, 1 percent above the same period last year. Per capita production of 2.25 pounds per person for June compares with 2.27 pounds for June 1959 and the 1949-58 average for the month of 2.54 pounds.

FLUID MILK AND CREAM REPORT
AUGUST 1960

August 17, 1960

Reserve
1.9
in 34m

Fluid milk prices throughout the United States in early August continued to advance seasonally at both producer and consumer levels, the Crop Reporting Board reports. Compared with early July, prices paid by dealers for fluid use milk this month were higher in 31 markets or 1 in about every 5. No significant decreases in dealer buying prices were shown for any market this month. Home delivered single quart prices were up from early July in 30 markets and down in none. Single quart out-of-store prices advanced in 18 markets, compared with declines in only 5. More increases than decreases were reported for half-gallon and gallon store prices. Producer prices are not currently determined in a number of markets, but will be shown next month.

Dealer buying prices for fluid use milk (including negotiated premiums) in about 160 markets during early August averaged \$5.48 per hundredweight -- up 13 cents from the preceding month and 6 cents from August last year. Prices paid by dealers this month (3.5 percent fat) were 19 cents per hundredweight higher than the 1954-58 August average. Price increases from the previous month were shown in all regions this year except the Pacific, where no change occurred. The gains varied from 1 cent per hundredweight in the Mountain States to 25 cents in the Middle Atlantic. Compared with August 1959, buying prices this month were higher in all regions except the Middle Atlantic.

Home delivered single quart milk prices in 25 major cities throughout the United States averaged 26.3 cents in early August. This was an increase of 0.2 cent from a month earlier and a gain of 0.6 cent from August 1959. The single quart home delivery price this month was 2.4 cents above the 1954-58 August average. From July to August, prices for milk delivered to homes advanced one-half cent per quart in New York City and Omaha, Nebr. Prices were 1 cent per quart higher in Hartford, Pittsburgh, Detroit, and Minneapolis. In Boston, single quart prices were up from one-half cent to a cent and one-half from the preceding month. Single quart prices of milk delivered to homes held steady in the other 18 cities this month.

Average daily whole milk sales (preliminary data) in 65 Federal Order and 6 State marketing areas during June were slightly below June 1959. May sales of skim milk products were 4 percent larger than for the same month a year earlier. Sales of milk and cream mixtures (half-and-half) showed a gain of 2 percent from May last year, while fluid cream sales were off 2 percent. Average daily sales of all fluid items (product-pound basis) during May were unchanged from the May total in 1959. June average daily receipts in 74 Federal Order and 5 State marketing areas were up 4 percent from June 1959. Receipts per producer in these 79 markets increased 6 percent from June last year.

Class I prices in the New England States averaged \$6.25 per hundredweight (3.5 percent fat) in early August -- 22 cents more than a month earlier and 1 cent higher than in August 1959. Dealer buying prices were unchanged from July in Augusta, Me., but single quart home delivered milk prices and quarts and half-gallons sold in stores were up 1 cent per unit. Class I prices were 22 cents per hundredweight higher in all New Hampshire markets reporting and in all Massachusetts, Rhode Island, and Connecticut Federal Order Markets. Both home and store prices in these markets advanced one-half cent per quart from early July, generally, except in Springfield and Worcester, Mass. and Hartford, Conn., where they were 1 cent per quart higher. Retail prices were also up 1 cent per quart in Bellows Falls and Burlington, Vt. Producer prices in these markets are not currently determined.

In the Middle Atlantic Region, prices paid by dealers for Class I milk during early August average \$6.19 per hundredweight. This was up 25 cents from the previous month, but down 2 cents from August last year. In the markets under the New York-New Jersey Federal Order, Class I prices advanced 33 cents per hundredweight from the previous month. Home delivered milk prices increased one-half cent per quart in New York City. Store half-gallons in Schenectady were reported off 6 to 7 cents from early July. Both home and store prices were up one-half cent per quart in the Northeastern New Jersey marketing area. Dealer prices were 46 cents per hundredweight higher in Pittsburgh, with corresponding retail price increases of a cent per quart.

The average price paid by dealers for fluid use milk in the East North Central States, at \$4.55 per hundredweight, advanced 14 cents from the preceding month and was 19 cents above the August price a year ago. Dealer buying prices in Columbus were up 18 cents per hundredweight from early July. No significant changes in retail prices occurred in this Ohio market. Producer prices were slightly higher in Evansville, Ind., where half-gallons out-of-stores were as much as 6 cents lower. Store half-gallon prices advanced 1 cent and gallons 2 cents from early July in Fort Wayne, but both home and store single quart prices held steady. Dealer buying prices in this market are not currently determined. Half-gallon prices in stores dropped another 2 to 3 cents in Springfield, Ill., where a price war has been in progress for about 11 weeks. Home and store prices advanced 1 cent per quart in both Battle Creek and Detroit, and home delivered milk was 1 cent per quart higher in Grand Rapids. Producer prices are not currently determined in these Michigan markets. Prices of milk sold in stores were reported down 1 cent per quart in Eau Claire, Wis. -- another market where dealer prices are not currently determined. Class I prices advanced 21 cents per hundredweight from early July in Green Bay, Wis. Home delivered milk increased 1 cent per quart and milk sold out-of-stores was about one-half cent per quart higher in this market.

Dealers throughout the West North Central Region paid an average price of \$4.38 per hundredweight for fluid milk in early August. This was an increase of 10 cents from early July this year and 14 cents from August 1959. Prices to consumers increased about 1 cent per quart from the preceding month in the Minneapolis and St. Paul markets. Class I prices in these cities were unchanged from early July. Dealer prices advanced 25 cents per hundredweight in Kansas City and 19 cents in St. Louis and Springfield, Missouri. Retail prices were unchanged

in Kansas City, St. Louis, and Springfield, Missouri.

Home delivered milk prices were up from 1 to 2 cents per quart in the Fargo-Moorhead, North Dakota area and store half-gallon prices were 4 to 5 cents higher, following the end of a price war. Class I prices are not reported for this market. Milk delivered to homes advanced 2 cents per quart in Grand Forks-- the only price change reported for the market. Dealer prices were 25 cents per hundredweight higher in Topeka but were 25 cents lower in Wichita, Kansas. No significant changes occurred in the retail prices in these markets.

Prices of milk for fluid use in the South Atlantic States during early August averaged \$6.11 per hundredweight -- gains of 2 cents from a month earlier and 3 cents from August last year. Store half-gallon prices dropped 4 cents from the previous month in Baltimore -- the only price change for the market. Home delivered milk was up $1\frac{1}{2}$ cents per quart in Huntington, W. Va., where Class I prices are not currently determined. Store prices are not reported for this market. Dealer buying prices climbed 59 cents per hundredweight in Wheeling, but retail prices were reported unchanged from early July.

Dealer buying prices in the East South Central States averaged \$5.22 per hundredweight in early August. This was up 2 cents from the previous month and 5 cents from the same month last year. Class I prices were up 31 cents per hundredweight from early July in Paducah, Ky., but no significant price changes occurred at the consumer level. Both home and store prices held steady in Nashville, Tenn. Dealer buying prices in this market increased 25 cents per hundredweight from the preceding month.

Early August Class I prices paid by dealers in the West South Central Region averaged \$5.48 per hundredweight -- up 4 cents from the preceding month and 13 cents from the August price a year ago. Store prices in Oklahoma City dropped as much as 6 cents per half-gallon from early July -- the only price change in the market. Retail prices advanced about 1 cent per quart in Austin, Galveston, and Houston this month. Dealer buying prices were 35 cents per hundredweight higher in both Galveston and Houston, but about the same as a month earlier in Austin.

Fluid milk prices in the Mountain States averaged \$5.48 per hundredweight in early August. This was 1 cent above the early July price and 4 cents higher than for August 1959. No major changes from the previous month were indicated for either producer or consumer prices in this region.

On the Pacific Coast, prices paid by dealers for Class I milk averaged \$5.19 per hundredweight in early August. This was unchanged from both the previous month and the August price a year earlier. Store single quart and half-gallon prices were down slightly from early July in Portland and Salem, Oregon-- the only price changes for the markets and the region this month.

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

5/ Base price; Surplus \$2.59.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, MAY-JUNE 1960

Whole milk sales down slightly from June last year

According to preliminary data, average daily sales of whole milk in 65 Federal Order and 6 State marketing areas during June declined 3 percent from a month earlier and were fractionally below the June sales in 1959. Cumulative daily whole milk sales for the 71 markets in the first half of 1960 were 1 percent larger than the January-June total last year.

May skim milk sales continue at higher level

Sales of skim milk products, on an average daily basis, in 69 marketing areas during May were down 4 percent from the previous month, but up 4 percent from May 1959. Cumulative daily sales of skim milk items for the first 5 months this year were 7 percent above the total for the same period in 1959.

Gain of 2 percent shown in half-and-half sales

May average daily sales of milk and cream mixtures (half-and-half in most markets) in 66 marketing areas this year declined 5 percent from April, but were 2 percent larger than the May sales a year earlier. Half-and-half sales during the first 5 months of 1960 were about 4 percent above the January-May total last year.

Fluid cream sales 2 percent below May 1959

Fluid cream sales (average daily basis) in 66 marketing areas during May showed decreases of 3 percent from the preceding month and 2 percent from the May sales in 1959. Sales from January through May this year were slightly larger than the total for the same period last year.

Total product sales unchanged

Average daily sales of all fluid items (product-pound basis) in 69 marketing areas for May were off 5 percent from April, but unchanged from the same month last year. Total product sales during the first 5 months this year were 1 percent larger than the January-May total in 1959.

June milk receipts 4 percent larger than year earlier

Average daily receipts of milk in 74 Federal Order and 5 State marketing areas during June, at 132.7 million pounds, decreased 5 percent from the previous month, but were up 4 percent from June a year ago. June receipts per producer in these markets averaged 698 pounds in 1960 -- down 30 pounds from a month earlier, but 38 pounds above the average for June last year. Tests of June receipts this year averaged 3.62 percent, compared with 3.67 percent for May and 3.61 percent for June a year earlier.

July milk production up about 1 percent

Milk production on farms in the United States during July, estimated at 11.2 billion pounds, was almost 1 percent above the July total last year, but 1 percent below the 1949-58 average for the month. Production declined 7 percent from June to July this year, which was about the usual seasonal decrease between these months. Farm milk output totaled 77.7 billion pounds in the first 7 months of 1960. This was 1 percent above the January-July total a year earlier. July production was sufficient to provide 2.01 pounds of milk per person -- 1 percent less than a year earlier and 12 percent under the 10-year July average.

FLUID MILK AND CREAM REPORT
SEPTEMBER 1960

September 16, 1960

SUMMARY

Prices of milk for fluid use in the United States during early September were up seasonally for the third consecutive month at both producer and consumer levels, the Crop Reporting Board reports. Prices paid by dealers were higher than a month earlier in 39 markets or 1 in about every 4. No decreases in dealer buying prices were reported this month. Prices of single quarts delivered to homes were up from the preceding month in 27 markets. Store prices were higher in 21 markets for quarts, 18 markets for half-gallons, and 11 markets for gallon jugs. Only a few declines from the previous month occurred in home and store prices. Producer prices are not currently determined in a number of markets, but will be shown next month.

Prices paid by dealers for fluid use milk (including negotiated premiums) in about 160 markets during early September averaged \$5.58 per hundredweight. This was an advance of 11 cents from a month earlier and 1 cent above the average for September last year. Dealer buying prices (3.5 percent fat basis) this month were 16 cents above the 1954-58 early September average. Compared with the previous month, prices were higher in all regions except the Mountain, where they were off 2 cents per hundredweight. The seasonal gains varied from 1 cent per hundredweight in the South Atlantic States to 25 cents in the Pacific. Price increases from September 1959 were shown in 4 of the 9 regions.

Home delivered single quart milk prices in 25 major cities throughout the United States averaged 26.5 cents in early September--up 0.2 cent from August this year and 0.6 cent from September last year. Compared with the 1954-58 early September average, the home delivery price this month was 2.4 cents higher. Milk delivered to homes increased one-half cent per quart from a month earlier in New York City and Los Angeles. Prices were up 1 cent per quart in Hartford, Conn. and San Francisco. In the Boston marketing area, single quart home delivered prices were as much as a cent and one-half higher.

According to preliminary data, average daily sales of whole milk in 65 Federal Order and 6 State marketing areas during July were down 2 percent from a year earlier. June skim milk sales were 3 percent above the June sales in 1959. Average daily sales of milk and cream mixtures (half-and-half) were up 3 percent from June last year, while fluid cream sales were unchanged from the preceding year. Average daily sales of all fluid items (product pound basis) during June were at about the same level as for the same month last year. July average daily receipts in 74 Federal Order and 5 State marketing areas showed a gain of 6 percent from July 1959. Receipts per producer in these 79 markets increased 6 percent from July a year earlier.

NEW THIS MONTH
AVERAGE PRICES PAID PRODUCERS INCLUDING
NEGOTIATED PREMIUMS IN SELECTED MARKETS
(See pages 3, 18 & 19)

PRICES IN FLUID MILK MARKETS, SEPTEMBER 1960

Dealers throughout the New England States paid an average price of \$6.44 per hundredweight for Class I milk (3.5 percent fat) in early September. This was an increase of 19 cents from the preceding month, but a decrease of 23 cents from September last year. Compared with early August, Class I prices were 14 cents per hundredweight higher in Fall River, Mass. and in the Rhode Island Federal Order Markets. Advances of 21 cents per hundredweight were shown for all New Hampshire markets reporting and for all other Massachusetts and Connecticut Federal Order Markets. These Class I price increases were reflected, generally, in gains of one-half cent per quart for both home and store sales. In Springfield and Hartford, however, retail prices were at least a cent per quart higher.

Prices of milk for fluid use in the Middle Atlantic during early September averaged \$6.34 per hundredweight--up 15 cents from August this year, but down 5 cents from September 1959. Class I prices in the New York-New Jersey marketing area advanced 21 cents per hundredweight from a month earlier. Retail prices were one-half cent per quart higher in New York City. In the Northeastern New Jersey marketing area, milk delivered to homes increased one-half cent per quart, but single quart prices in stores were lower. Both home and store prices were up about 1 cent per quart in Binghamton, N. Y. Dealer buying prices were 50 cents per hundredweight higher in Harrisburg, and 40 cents higher in Erie, Johnstown, Reading, and Scranton. Both home and store prices in these Pennsylvania markets increased 1 cent per quart from the previous month.

Fluid milk prices in the East North Central Region averaged \$4.60 per hundredweight in early September. This was an advance of 6 cents from the previous month and 16 cents above the September price a year ago. Dealer buying prices increased 19 cents per hundredweight from early August in Cincinnati, with some advances shown in home and store prices. Class I prices were up 17 cents per hundredweight in Columbus and 11 cents in Dayton, but retail prices in these Ohio markets were stable. Half-gallon prices in stores were from 1 to 5 cents higher in Toledo. Dealer buying prices in this market are not currently determined. Some weakness was shown in store single quart and gallon prices in Rock Island, where dealer prices were unchanged. Class I prices were up 20 cents per hundredweight in Springfield, Ill. Home delivery prices held steady, but store quarts were 1 cent lower and half-gallons were off 8 to 9 cents due to price war conditions which are still in effect in this market. Home delivered milk declined one-half cent per quart in Beloit, Wis., where dealer prices were down 10 cents per hundredweight. Milk delivered to homes dropped 1 cent per quart in Eau Claire, Wis.--another not currently determined market.

Early September dealer buying prices in the West North Central States averaged \$4.35 per hundredweight--up 2 cents from a month earlier, but off 5 cents from September last year. Milk prices out-of-stores were up 1 cent per quart from early August in Minneapolis--the only significant price change for that market. Both home and store prices were slightly higher in the Fargo-Moorhead, N. D.-Minn. marketing area this month. Dealer buying prices for this market are not reported. Small Class I price increases occurred in several markets.

Class I prices in the South Atlantic averaged \$6.10 per hundredweight in early September. This was an increase of 1 cent from both August this year and September a year earlier. Dealer prices in Wheeling, W. Va. advanced 13 cents per hundredweight from a month earlier. Retail prices in this market were unchanged, however. Store half-gallon prices were down 2 cents and gallon jugs 3 cents in

Jacksonville, where price wars have recurred intermittently during the last several months. Milk delivered to homes advanced 1 cent per quart from early August in Miami--the only significant price change in the market.

The average price paid by dealers for fluid use milk in the East South Central Region, at \$5.31 per hundredweight, advanced 8 cents from the preceding month, but was 2 cents under the September price in 1959. Compared with early August, dealer buying prices were up 17 cents per hundredweight in Paducah, Ky., 24 cents in Chattanooga, and 30 cents in Knoxville. Retail prices in these markets were relatively stable, however. Both home and store prices were 2 cents per quart higher in Nashville, where Class I prices were up 20 cents per hundredweight.

In the West South Central States, Class I prices paid by dealers averaged \$5.52 per hundredweight during early September. This was 2 cents more than a month earlier and 19 cents higher than for September a year ago. Half-gallon prices out-of-stores were reported from 7 to 8 cents lower than for the preceding month in New Orleans, where Class I prices were up slightly.

Prices paid by dealers for fluid use milk in the Mountain Region during early September averaged \$5.46 per hundredweight--down 2 cents from August this year and 1 cent from September last year. No important price changes from the preceding month were reported for the Mountain Region this month.

Dealer buying prices on the Pacific Coast averaged \$5.44 per hundredweight in early September. This was an advance of 25 cents from the previous month and 1 cent above the August price a year earlier. Single quart store prices were off from 1 to 2 cents in Everett, Wash.--the only price change from the preceding month in

(Continued on page 27)

BLEND PRICES

A new departure in reporting blend prices starts with this issue. While minimum blend prices in Federal Order markets have been carried in table 7 of previous issues, negotiated Class I prices and the resulting blend prices are now included for the first time (see pages 18 and 19).

For the Federal markets shown, the "average prices paid to milk producers" are the blends of minimum order prices except when higher than order Class I prices are negotiated. Where Class I prices above Federal Order minimum prices have been negotiated by producer groups and handlers, the resulting blend prices are shown in the table. These are the prices paid by the producers' association or associations providing the major portion of the milk for the market. The prices included in the table have been supplied by the associations.

The new table 7 carries the markets appearing in former tables 7 and 8 with the Niagara Frontier and Rochester, N. Y. markets added. All prices in this table are for the month of July 1960.

The prices quoted do not include bulk tank or other special premiums such as for quality or quantity-delivery unless indicated. For comparison, prices of milk for fluid use only (Class I prices in most markets) are shown for the same month. The last column in the table affords a comparison of the prices converted to a 3.5 percent fat basis for each area.

^{1/} "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

^{2/} In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, JUNE-JULY 1960

Whole milk sales down 2 percent from July last year

Preliminary whole milk sales for July in 65 Federal Order and 6 State marketing areas, at 69,486,000 pounds per day, declined 3 percent from the preceding month. July sales were 2 percent below the 70,980,000-pound daily average for July 1959. Whole milk sales during the first 7 months of 1960 were slightly above the total for the same period last year.

June sales of skim milk items 3 percent larger

Skim milk sales (average daily basis) in 69 marketing areas during June advanced 2 percent from a month earlier and were 3 percent above June sales in 1959. Compared with June last year, sales were up 7 percent in Chicago and 1 percent in California. Skim milk sales in these 2 marketing areas account for about one-third of the 69 market total. Cumulative daily skim milk sales in the first half of 1960 were 6 percent larger than the January-June total a year earlier.

Half-and-half sales 3 percent above June 1959

Average daily sales of milk and cream mixtures (half-and-half in most markets) during June in 66 marketing areas increased 1 percent from the previous month and were 3 percent larger than the June sales last year. Sales were up 3 percent from a year earlier in Chicago, but off 3 percent in California. These two areas combined represent about one-half of the 66-market total. Half-and-half sales in the other 64 marketing areas were 6 percent above June 1959. Half-and-half sales from January through June this year were up 3 percent from the same period last year.

Fluid cream sales unchanged

Fluid cream sales, on an average daily basis, in 66 marketing areas during June were down 1 percent from a month earlier, but about the same as for June last year. Fluid cream sales during the first half of 1960 were at about the same level as the January-June total in 1959.

No change shown in total product sales

Average daily sales of all fluid items (product pound basis) in 69 marketing areas for June were down 2 percent from the preceding month, but at about the same level as for June 1959. Total product sales during the first 6 months this year were almost 2 percent above the total for the same period in 1959.

July milk receipts continue at higher level

Average daily receipts of milk in 74 Federal Order and 5 State marketing areas during July, at 117.7 million pounds, declined 11 percent from the previous month, but were 6 percent larger than for July last year. Receipts per producer in these markets averaged 620 pounds per day in July. This was a decline of 78 pounds from a month earlier, but 36 pounds above the average for July a year ago. Tests of total receipts in the 79 marketing areas averaged 3.62 percent this July--the same as for both the preceding month and July last year.

(Continued on page 27)

1/ Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas. Data reported in each comparison are for comparable areas. Previous year data revised, previous and current months preliminary. For a list of the markets combined in this table, see April 1960 report.
 2/ Federal market totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
 3/ Data comprise plant receipts of Grade A milk from state producers.

Compiled from reports of Market Administrators and State milk control agencies.

(Continued from page 20)

August farm milk production 1 percent above a year earlier

Milk production on farms throughout the United States this August was estimated at 10.3 billion pounds--up about 1 percent from August 1959, but down 1 percent from the 1949-58 average for the month. Output on farms decreased 8 percent from July to August, which was about the usual seasonal decrease between these months. Farm milk production during the first 8 months of 1960, at 88.0 billion pounds, was 1 percent above the corresponding total in 1959. Relative to population, total output this August would have provided 1.85 pounds of milk daily per person. This was about the same as the per capita rate for August a year earlier, but 12 percent below the 10-year average for the month.

(Continued from page 3)

this market. Class I prices advanced 45 cents per hundredweight in Fresno, Sacramento, and San Francisco, California. Retail prices in these markets increased a corresponding 1 cent per quart from a month earlier. Dealer prices were up 21 cents per hundredweight in Los Angeles, San Diego, and Santa Barbara. Home and store prices advanced one-half cent per quart from early August in Los Angeles and Santa Barbara. In San Diego, single quarts at homes and stores were 1 cent higher. Half-gallons in stores increased 1½ cents and gallon jugs were up 3 cents from the preceding month.

FLUID MILK AND CREAM REPORT
OCTOBER 1960

SUMMARY

Early October fluid milk prices throughout the United States were up slightly from the preceding month at both producer and consumer levels, the Crop Reporting Board reports. Compared with early September, prices paid by dealers for fluid use milk were higher in 39 markets or 1 in about every 4. Producer prices were down from the previous month in only 1 market. Home delivered single quart milk prices were higher in 10 markets and lower in only 1. Slightly more advances than declines were reported for out-of-store prices this month. Producer prices are not currently determined in a number of markets, but will be shown next month.

Buying prices paid by dealers for fluid use milk (including negotiated premiums) in about 160 markets during early October averaged \$5.66 per hundredweight on a 3.5 percent fat basis. This was an increase of 8 cents from the preceding month and 3 cents above October last year. The dealer buying price this month was 14 cents per hundredweight higher than the 1954-58 early October average. Prices paid by dealers were up from a month earlier in 7 of the 9 regions. The gains ranged from 1 cent per hundredweight in the New England States to 20 cents in the Middle Atlantic. Dealer buying prices were unchanged from early September in the South Atlantic and were off 1 cent per hundredweight in the Pacific Region.

Single quart prices of home delivered milk in 25 major cities throughout the United States in early October averaged 26.7 cents -- up 0.1 cent from the previous month and 0.7 cent from October a year earlier. The single quart home delivery price this month was 2.3 cents above the 1954-58 early October average. Milk delivered to homes advanced one-half cent per quart from early September in New York City. Prices were up 1 cent per quart in both Philadelphia and Indianapolis. No changes in home delivery single quart prices were reported for the other 22 cities this month.

Average daily whole milk sales (preliminary data) in 65 Federal Order and 6 State marketing areas during August were unchanged from August sales in 1959. July skim milk sales were up 2 percent from the same month last year. Average daily sales of milk and cream mixtures (half-and-half) showed a gain of 2 percent from July 1959, while fluid cream sales were off 3 percent from a year earlier. Average daily sales of all fluid items (product pound basis) in July decreased 2 percent from the preceding year. August average daily milk receipts in 74 Federal Order and 5 State marketing areas were 7 percent larger than for August 1959. Receipts per producer in these 79 markets were up 9 percent from the previous year.

PRICES IN FLUID MILK MARKETS, OCTOBER 1960

In the New England States, prices paid by dealers for Class I milk (3.5 percent fat) in early October averaged \$6.45 per hundredweight. This was up 1 cent from the previous month, but down 21 cents from the October price last year. No significant Class I price changes from early September were reported in the region this month. Half-gallons sold in stores were up from 1 to 3 cents per container in both Augusta and Portland, Me. -- the only price changes in these markets. Prices of milk delivered to homes were up slightly in Boston and gallon jugs sold out-of-stores in Springfield, Mass. were from 3 to 4 cents higher.

Class I prices in the Middle Atlantic averaged \$6.54 per hundredweight during early October -- 20 cents higher than a month earlier, but unchanged from October 1959. In the markets under the New York-New Jersey Federal Order, Class I prices were up 23 cents per hundredweight from the preceding month. Retail prices held steady in Binghamton and Syracuse. Half-gallon store prices were reported off 2 cents in Albany this month. In New York City, milk delivered to homes advanced one-half cent per quart and store quarts were up as much as one-half cent. Home delivery milk prices were unchanged in Schenectady, but store prices declined slightly. In the Northeastern New Jersey marketing area, prices of milk sold at homes were up one-half cent per quart and single quarts sold in stores were from 1 to 2 cents higher. Class I prices advanced 40 cents per hundredweight in Philadelphia, with corresponding increases of 1 cent per quart from the previous month in both home and store prices.

Prices paid by dealers for fluid use milk in the East North Central Region during early October averaged \$4.63 per hundredweight. This was an advance of 2 cents from the preceding month and 16 cents above the October price a year earlier. Compared with early September, dealer buying prices were 12 cents per hundredweight higher in both Cincinnati and Dayton. Store prices were reported down slightly in Cincinnati, while no significant retail price changes occurred in the Dayton market. Producer prices declined a little in Columbus, but retail prices were up one-half cent per quart for home delivered milk, 1 cent for store quarts, 2 to 4 cents for store half-gallons, and 4 to 5 cents for store gallon jugs. Home delivery prices were 1 cent per quart higher in both Fort Wayne and Indianapolis. Store prices were steady in Fort Wayne, while store quarts were up 2 cents in Indianapolis. Producer prices in these 2 Indiana markets are not currently determined. Dealer prices advanced 12 cents per hundredweight in both Evansville, Ind. and Alton, Ill. Retail prices in these markets held steady from early September. Half-gallon prices in stores were 10 cents higher in Springfield, Ill., where price war conditions have been in effect for a number of months. Dealer buying prices in this market increased 30 cents per hundredweight. Producer prices were up 12 cents per hundredweight from a month earlier in Green Bay and Superior. Both home and store prices in these Wisconsin markets were unchanged from early September.

The average price paid by dealers for fluid milk in the West North Central States, at \$4.45 per hundredweight, showed a seasonal increase of 10 cents from early September, but was 1 cent lower than for October a year ago. Dealer prices advanced 12 cents per hundredweight from early September in Duluth, but retail prices were unchanged. Both home and store prices were one-half cent per quart higher in Des Moines, where producer prices advanced 12 cents per hundredweight. In Missouri, dealer buying prices were up 16 cents per hundredweight in Kansas City, and 12 cents in both St. Louis and Springfield. Retail prices for these markets were unchanged. Dealer prices were 12 cents per hundredweight higher in Aberdeen, S.D., but retail prices held steady. Both home and store prices were up 1 cent per quart

in Sioux Falls, where a 10-cent advance was shown in producer prices. Class I prices increased 16 cents per hundredweight from a month earlier in both Kansas City and Topeka -- the only price changes in these Kansas markets.

Dealers throughout the South Atlantic paid an average price of \$6.09 per hundredweight for fluid use milk in early October. This was unchanged from both a month earlier and October last year. Class I prices were up 20 cents per hundredweight from the preceding month in Wilmington, Del. Both home and store prices in this market held steady from early September. Store half-gallon prices were reported down 2 cents in Charleston, W. Va. and some weakness was shown in gallon jug prices sold in stores. Class I and home delivered prices in Charleston were unchanged. Gallon jug prices were 3 cents higher in Jacksonville, Fla. -- the only price change in the market. Home delivery prices were 1 cent per quart lower; store quarts were 3 cents higher, and store half-gallon prices dropped 16 cents in Miami. Price war conditions in this market have been in existence for several months.

Fluid milk prices in the East South Central Region during early October averaged \$5.45 per hundredweight -- 14 cents higher than for the previous month and up 9 cents from October 1959. Compared with a month earlier, Class I prices were up 34 cents per hundredweight in both Lexington and Louisville and were 12 cents higher in Paducah. No significant changes in retail prices were reported for these Kentucky markets this month. Dealer prices advanced 34 cents per hundredweight in Memphis, Tenn. Both home and store prices held steady in this market, however. Class I prices were up 12 cents per hundredweight in all Mississippi markets reporting. Retail prices in Jackson were unchanged, but prices in the other markets in the State have not been reported.

Dealer buying prices in the West South Central States averaged \$5.55 per hundredweight in early October. This was an advance of 4 cents from early September and 13 cents above the October price a year earlier. Class I prices advanced 12 cents per hundredweight in both Fort Smith, Ark. and New Orleans and were 13 cents higher in Shreveport, La. The only retail price change in these markets was a 4-cent increase for half-gallons sold out-of-stores in New Orleans. Gallon prices in stores were down as much as 6 cents per jug in Oklahoma City -- the only price change in the market. Store half-gallon prices declined 1 cent in Austin, Tex., where producer prices were up slightly.

Early October Class I prices in the Mountain Region averaged \$5.49 per hundredweight -- up 3 cents from the previous month and 1 cent from the October price a year ago. Compared with early September, dealer buying prices were 12 cents per hundredweight higher in both Colorado Springs and Pueblo this month. Home and store prices in these markets held steady. Class I prices advanced 11 cents per hundredweight in both Phoenix and Tucson, Ariz. Retail prices were unchanged in Tucson, but both home and store prices increased 1 cent per quart from a month earlier.

On the Pacific Coast, prices paid by dealers for Class I milk averaged \$5.34 per hundredweight in early October. This was off 1 cent from September, but unchanged from the October price in 1959. Half-gallon store prices were 6 cents higher than a month earlier in Everett, Wash. Stores in that market have put in one-half gallon glass jugs at wholesale list to meet competition. Spokane Class I prices advanced 12 cents per hundredweight, but retail prices held steady. Dealer prices to producers were off 12 cents per hundredweight from early September in Portland, Ore. this month. Home delivery prices were unchanged in this market, but some weakness was shown in single quart and half-gallon prices out-of-stores.

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

* Revised.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, JULY-AUGUST 1960

August whole milk sales about unchanged from preceding year

According to preliminary data, average daily sales of whole milk in 65 Federal Order and 6 State marketing areas during August totaled 71.0 million pounds. This was an advance of 2 percent from a month earlier, but practically unchanged from the sales of 71.2 million pounds in August 1959. Average daily whole milk sales for the 71 markets during the first 8 months of 1960 were less than one-half percent above the total during January-August last year.

July skim milk sales again at higher level

Sales of skim milk products, on an average daily basis, in 69 marketing areas during July declined 2 percent from the preceding month, but were 2 percent above the July sales a year earlier. Sales were about the same as for July last year in California, but were up 5 percent in Chicago. Skim milk sales in these 2 marketing areas represent about one-third of the 69-market total. Daily skim milk sales during the first 7 months of 1960 were 6 percent above the January-July total in 1959.

Gain of 2 percent shown in half-and-half sales

July average daily sales of milk and cream mixtures (half-and-half in most markets) in 66 marketing areas this year were down 4 percent from June, but up 2 percent from July 1959. Sales were off 1 percent from a year earlier in both Chicago and California, which account for about one-half of the total for the 66 markets. Half-and-half sales in the other 64 marketing areas were 4 percent larger than the July sales last year. Cumulative average daily sales from January through July were 3 percent larger than the total for the same period a year earlier.

Fluid cream sales down 3 percent from July 1959

Fluid cream sales (average daily basis) in 66 marketing areas during July dropped 9 percent from the previous month and were 3 percent below the July sales in 1959. Average daily sales during the first 7 months this year were at about the same level as in January-July last year.

Total fluid sales off 2 percent in July

Average daily sales of all fluid items (product pound basis) in 69 marketing areas during July declined 3 percent from the preceding month and were 2 percent below the same month a year earlier. Total product sales during the first 7 months of 1960 were 1 percent larger than the total for the same period in 1959.

August milk receipts 7 percent above year earlier

Average daily milk receipts in 74 Federal Order and 5 State marketing areas during August this year totaled 113.2 million pounds. This was down 4 percent from a month earlier, but up 7 percent from the August receipts last year. August daily receipts per producer in these markets averaged 599 pounds in 1960 -- off 21 pounds from a month earlier, but 50 pounds above the average for August 1959. Tests of August receipts in 79 marketing areas averaged 3.62 percent, the same as for both July this year and August last year.

(Continued on page 27)

- 2/ Federal market totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
- 3/ Data comprise plant receipts of Grade A milk from state producers.

Compiled from reports of Market Administrators and State milk control agencies.

(Continued from page 20)

September farm milk production at slightly higher level

According to Crop Reporting Board estimates, milk cows throughout the United States produced 9.5 billion pounds of milk during September. This was up about one-third of 1 percent from September last year and up 2 percent from the 1949-58 average for the month. Milk production declined 8 percent from August to September this year -- about the same seasonal decrease as a year earlier. Output during the first 9 months of 1960, at 97.5 billion pounds, was 1 percent above the January-September total last year. Relative to population, September milk production was sufficient to provide 1.75 pounds of milk per person -- 2 percent less than for September 1959 and 8 percent below the 10-year average for the month.

FLUID MILK AND CREAM REPORT
NOVEMBER 1960

November 17, 1960

SUMMARY

Fluid milk prices in early November again averaged slightly higher than a month earlier at both producer and consumer levels, the Crop Reporting Board reports. Prices of milk for fluid use were up from the preceding month in 39 markets and unchanged in the remainder of the 160 markets reporting. A few more increases than decreases were reported for home delivery and store prices this month. Producer prices are not currently determined in a number of markets, but will be shown next month.

Dealer buying prices for fluid use milk (including negotiated premiums) during early November averaged \$5.72 per hundredweight -- up 5 cents from the previous month and up 7 cents from November last year. Prices paid by dealers this month (3.5 percent fat basis) were 18 cents above the 1954-58 early November average. Compared with the preceding month, prices were higher in 7 of the 9 regions. The increases varied from 1 cent per hundredweight in the Pacific States to 10 cents in the West North Central. Dealer buying prices held steady from a month earlier in both the New England and South Atlantic Regions. Price increases from November 1959 were shown in 7 of the 9 regions. Dealer prices were unchanged from a year earlier in the Pacific States, but off 22 cents per hundredweight in New England.

Prices per single quart of milk delivered to homes in 25 major cities throughout the United States averaged 26.7 cents in early November. This was unchanged from early October, but 0.7 cent higher than for November last year. Compared with the 1954-58 early November average, the home delivery price this month was up 2.3 cents. Milk delivered to homes increased 1 cent per quart from a month earlier in Louisville, Ky., but held steady in the other 24 cities.

According to preliminary data, average daily sales of whole milk in 65 Federal Order and 6 State marketing areas during September were at about the same level as a year earlier. August skim milk sales showed an increase of 6 percent from the same month last year. Average daily sales of milk and cream mixtures (half-and-half) were up 5 percent from August 1959, while fluid cream sales increased fractionally. Average daily sales of all fluid items (product pound basis) during August were 1 percent larger than for the same month in 1959. September average daily receipts of milk in 74 Federal Order and 5 State marketing areas were up 6 percent from the preceding year. Receipts per producer in these 79 markets showed a gain of 7 percent from a year earlier.

PRICES IN FLUID MILK MARKETS, NOVEMBER 1960

Class I prices in the New England States averaged \$6.45 per hundredweight (3.5 percent fat) in early November. This was unchanged from a month earlier, but off 22 cents from November a year ago. Both home and store prices advanced 1 cent per quart from the preceding month in Burlington, Vt. Half-gallons sold in stores were up from 2 to 3 cents per unit. Producer prices are not currently determined in the Burlington market.

The average price paid by dealers for fluid use milk in the Middle Atlantic Region, at \$6.62 per hundredweight, was up 8 cents from the preceding month and 4 cents from the November price last year. Class I prices in the New York - New Jersey marketing area were up 11 cents per hundredweight from early October. Milk delivered to homes declined 1 cent per quart in Albany, but gallon jugs sold out-of-stores were reported up as much as 6 cents. Both home and store prices were off 1 cent per single quart in Schenectady. Store half-gallon prices in this market were up slightly from a month earlier, however. No other New York-New Jersey area changes were reported.

Dealers in the East North Central Region paid an average of \$4.71 per hundredweight for fluid use milk in early November. This was an increase of 4 cents from early October, and 22 cents above November 1959. Dealer buying prices in Cincinnati were up 14 cents per hundredweight from the preceding month. Home delivery prices in this market were unchanged, but store prices were 1 cent higher for single quarts and 4 cents higher for gallon jugs. Dealer prices advanced 11 cents per hundredweight in Columbus, but retail prices held steady. Prices of milk delivered to homes were unchanged in Toledo, while store prices showed increases of as much as 1 cent per single quart and 4 cents per half-gallon. Producer prices in this market are not currently determined. Dealer buying prices were 11 cents per hundredweight higher in Evansville, Ind., where some weakness was shown in half-gallon prices in stores. In Peoria, Ill., store prices were up 2 cents per single quart. Store half-gallon and gallon prices in this market showed mixed changes from the preceding month. Dealer prices are not currently determined in Peoria. Producer prices advanced 21 cents per hundredweight in Springfield, Ill. -- the only significant price change for the market. Retail prices in Grand Rapids, Mich. (another market where producer prices are not currently determined) dropped sharply from early October due to price war conditions. Home delivered milk prices declined from 1 to 6 cents per single quart and milk prices in stores were off as much as 4 cents per single quart. Dealer buying prices were up 11 cents per hundredweight in both Green Bay and Milwaukee. Retail prices in these 2 Wisconsin markets, however, were unchanged from the previous month.

Early November dealer buying prices in the West North Central States averaged \$4.54 per hundredweight -- 10 cents more than for October and 9 cents above the early November average in 1959. Prices paid by consumers were unchanged from a month earlier in Des Moines, where dealer prices advanced 11 cents per hundredweight. Retail prices were also unchanged in Greater Kansas City, Mo.-Kans., although producer prices rose 15 cents per hundredweight. Dealer prices advanced 13 cents per hundredweight in both St. Louis and Springfield, Mo. Both home and store prices increased 1 cent per quart in Springfield. Home delivery milk prices were also up 1 cent per quart in St. Louis, but store prices were not reported this month. Aberdeen, S. Dak., dealer prices were 11 cents per hundredweight higher, but home and store prices held steady. In the other Kansas markets reporting, retail prices were unchanged from early October. Dealer buying prices were up 15 cents per hundredweight in Topeka, and 16 cents in Wichita.

Prices of milk for fluid use in the South Atlantic Region averaged \$6.10 per hundredweight in early November. This was unchanged from the preceding month, but 1 cent higher than for November 1959. Class I prices in Wheeling, W. Va. advanced 15 cents per hundredweight from a month earlier. Retail prices for this market were not reported, however. Milk sold out-of-stores in Miami, Fla., declined 2 cents per single quart -- the only significant price change for the market.

Dealer buying prices in the East South Central States averaged \$5.51 per hundredweight in early November -- up 6 cents from a month earlier and up 17 cents from November a year ago. Class I prices in both Lexington and Louisville were up 13 cents per hundredweight from early October. Both home and store prices advanced 1 cent per quart in Louisville. Retail prices for Lexington, however, were not reported this month. The only retail price change in Paducah, where Class I prices were up 11 cents per hundredweight, was an increase of 1 cent per half-gallon container in stores. Half-gallon and gallon prices in stores advanced 2 cents per unit in Chattanooga, Tenn. -- the only price changes in that market. Store gallon prices dropped 19 cents per jug in Knoxville, where a price war has developed. All other prices in this market held steady from a month earlier. Class I prices in Memphis were 15 cents per hundredweight higher this month. Both home and store prices in Memphis advanced 1 cent per quart. Dealer prices were up 12 cents per hundredweight in all Mississippi markets reporting. Both home and store prices increased about 1 cent per single quart in Jackson -- the only individual market price quotation for the State.

Prices paid by dealers in the West South Central Region during early November averaged \$5.62 per hundredweight. This was up 7 cents from early October and 18 cents above the November price last year. Compared with the preceding month, Class I prices advanced 13 cents per hundredweight in Fort Smith, Ark. Prices of milk delivered to homes were up 2 cents per quart in this market and both single quart and half-gallon prices in stores were also 2 cents per container higher. Class I prices rose 12 cents per hundredweight in Little Rock, where the only retail price change was a slight decrease in half-gallon prices out-of-stores. Dealer prices gained 12 cents per hundredweight in New Orleans and 13 cents in Shreveport. Consumer prices in both these Louisiana markets held steady from the preceding month. Gallon jug prices in stores were off 2 cents in Oklahoma City -- the only price change reported this month. Class I prices advanced 14 cents per hundredweight in Tulsa, where home delivery prices were unchanged and some weakness was evident in store prices. Store half-gallon prices were up 1 cent in Austin, Texas -- the only significant price change in the market.

Fluid milk prices in the Mountain States averaged \$5.53 per hundredweight during early November. This was 4 cents higher than for the previous month and 9 cents above November a year ago. Class I prices were 11 cents per hundredweight higher than a month earlier in both Colorado Springs and Pueblo, Colo. Home and store prices were up 1 cent per quart in Colorado Springs, but unchanged in Pueblo. Dealer prices in both Phoenix and Tucson, Ariz., rose 19 cents from early October. Retail prices in these markets were up 1 cent per quart.

Class I prices paid by dealers in the Pacific Coast States during early November averaged \$5.44 per hundredweight -- up 1 cent from the preceding month, but unchanged from November 1959. Store prices declined about 1 cent per single quart and 6 cents per half-gallon from early October in Everett, Wash., due to recent price war conditions. Dealer buying prices in Spokane were 14 cents per hundredweight higher than in the previous month, but consumer prices held steady in that market.

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

1/ Federal Order markets unless otherwise noted. 2/ Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, the prices are Class I prices including premiums negotiated by principal producers' associations. For minimum Class I price, see Table 1(a) for respective month. 3/ Prices paid to all or the major group of producers in the market for all pooled milk including milk diverted to manufacturing use. In Federal markets, prices include general premiums negotiated by principal producers' associations but do not include bulk tank, or other special premiums unless indicated. Prices quoted are before association checkoff and other deductions for marketing services. 4/ Individual handler pool. Weighted average of handlers' prices. S- Data from State sources. D.R.-Payment in direct ratio to milkfat. Prices converted to 3.5% fat basis. PA-Producers' association prices. 5/ Negotiated prices paid members of principal producers' associations. 6/ Includes average quality premium paid on Class I milk. 7/ The following changes have been made for fall production fund: Added: Connecticut 16¢; Cincinnati 33¢; Columbus 32¢; Dayton-Spfg. 27¢; Sioux City 37¢; Omaha-Lin. 39¢; Platte Valley 38¢; Southwest Kans. 54¢; Louisville-Lex. 43¢. 8/ Association average blend price for the Omaha-Lincoln-Council Bluffs and Platte Valley markets together; Bluefield and Appalachian together. 9/ Average of blend prices paid by all plants in the State. 10/ PMCC Area I price for milk produced in Pennsylvania. 11/ August basic blend \$5.52, fat differential 8.0 cents. 12/ \$5.46-Shreveport; \$5.80 Ruston, Monroe & Bastrop. 13/ Assn. seasonal incentive payment. 14/ Tulsa Assn. FOM blend \$4.63, incl. prem. \$4.82. 15/ Ardmore prod. \$5.06, Lawton \$5.08.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, AUGUST-SEPTEMBER 1960

September 1960 whole milk sales at about same level as a year earlier

Preliminary whole milk sales during September in 65 Federal Order and 6 State marketing areas, at 77.1 million pounds per day, showed a gain of 9 percent from the preceding month, but were about the same as the September average daily sales a year earlier. Whole milk sales during the first 9 months of this year were up slightly from the total for the same period last year.

August sales of skim milk items 6 percent larger

Skim milk sales (average daily basis) in 69 marketing areas during August increased 3 percent from a month earlier and were 6 percent above the August sales in 1959. Compared with August last year, skim milk sales were up 8 percent in Chicago and 1 percent in California (both markets together making up about one-third of total sales for the 69 markets). Cumulative daily sales in the first 8 months of 1960 were 6 percent above the January-August total a year earlier.

Half-and-half sales 5 percent above August last year

Average daily sales of milk and cream mixtures (half-and-half in most markets) during August in 66 marketing areas showed an increase of 2 percent from early July and were 5 percent larger than the August sales last year. Sales were up 4 percent from August 1959 in Chicago, but were off 1 percent in California. Sales in these 2 areas account for about one-half of the 66-market total. Sales in the remaining 64 marketing areas showed an increase of 9 percent from the August sales a year earlier. Half-and-half sales during the first 8 months this year were up 3 percent from the total for the same period in 1959.

Fluid cream sales increase slightly

August average daily fluid cream sales in 66 marketing areas declined 1 percent from the preceding month, but were slightly above the August sales last year. Cumulative sales from January through August were up fractionally from the same period a year earlier.

August total product sales show gain of 1 percent from year earlier

Average daily sales of all fluid items (product pound basis) in 69 marketing areas during August were up 3 percent from a month earlier and 1 percent from the August sales last year. Total product sales in the first 8 months of 1960 were 1 percent above the January-August total in 1959.

- 1/ Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas. Data reported in each comparison are for comparable areas. Previous year data revised, previous and current months preliminary. For a list of the markets combined in this table, see April 1960 report.
 2/ Federal market totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
 3/ Data comprise plant receipts of Grade A milk from state producers.

Compiled from reports of Market Administrators and State milk control agencies.

(Continued from page 20)

September milk receipts again at higher level

Average daily receipts of milk in 74 Federal Order and 5 State marketing areas during September, at 116.1 million pounds, advanced 3 percent from the previous month and were 6 percent larger than for September a year ago. Average daily receipts per producer in these 79 markets were 611 pounds during September. This was an increase of 13 pounds from the preceding month and 41 pounds from September a year earlier. Tests of September receipts this year averaged 3.67 percent, compared with 3.62 percent for the previous month and 3.67 percent for September 1959.

Farm milk production about 1 percent above October 1959

Cows on farms throughout the United States produced 9.5 billion pounds of milk during October, the Crop Reporting Board reports. This was almost 1 percent above October a year earlier and 7 percent up from the 1949-58 average for the month. Part of the increase over average for October is the result of the trend toward more fall freshenings. Milk output during the first 10 months of 1960, at 107 billion pounds, was 1 percent above the total for the corresponding period last year. Milk production during October would have provided 1.70 pounds daily per person--1 percent less than a year earlier and 4 percent below the 10-year average for the month.

OFFICIAL BUSINESS

FLUID MILK AND CREAM REPORT
DECEMBER 1960

SUMMARY

Prices for fluid milk in early December showed mixed changes from November at both producer and consumer levels, the Crop Reporting Board reports. Prices paid by dealers were higher in 14 markets but lower in 11. Home delivery prices were up in 10 markets and down in 1 for single quarts. Store prices were up in 11 markets for quarts, 12 markets for half-gallons and 5 markets for gallons. Lower store prices were reported in 7 markets for quarts and 9 markets for half-gallons. In a number of markets, producer prices were not currently determined and will be reported next month.

Prices paid by dealers for milk for fluid use (including premiums over minimum prices in Federal Order markets) during early December averaged \$5.71 per hundredweight. This was 2 cents less than for November but 10 cents more than for December a year ago. Compared with the December 1954-58 average, dealers' buying prices were 20 cents higher. December prices averaged lower than November by 6 cents per hundredweight in the important Middle Atlantic region and 5 cents in the West North Central. The average was unchanged in New England and the South Atlantic and only 1 cent higher in the East North Central, East South Central and Pacific regions. Sizable increases were reported in only the West South Central, 10 cents, and Mountain States, 4 cents. Prices were higher than December last year in all regions except the South Atlantic which was unchanged and New England which was 22 cents lower.

The single quart price for milk delivered to homes in 25 important cities averaged 26.8 cents in early December -- 1 tenth cent above early November and 7 tenths cent above December last year. Compared with the 1954-58 average for the month, the December price was 2.3 cents higher. Increases from November were 1½ cents per quart in Seattle, Wash. and one-half cent per quart in San Francisco, Calif. Single quart home delivered prices were, however, unchanged in the remaining 23 cities.

Preliminary October whole milk sales in 65 Federal Order and 6 State marketing areas during October averaged 73.1 million pounds per day. This was about the same as September but 3 percent less than October last year. Skim milk sales (average daily basis) in September in 69 of these areas were 3 percent over August and 7 percent above September a year ago. September daily sales of milk and cream mixtures (half-and-half) were 2 percent over August and 3 percent higher than in the same month of 1959. Fluid cream sales during September averaged about the same as August and were a fraction of a percent higher than September 1959. Sales of all fluid products in September advanced 9 percent from August and were 1 percent above September a year ago. Average daily receipts of milk from producers in 74 Federal Order and 5 State marketing areas in October were 2 percent higher than September and 8 percent above October last year. Receipts per producer in October were 10 percent higher than a year earlier.

PRICES IN FLUID MILK MARKETS, DECEMBER 1960

Dealers buying prices for Class I milk in New England, in early December averaged \$6.45 per hundredweight. This was the same as November but 22 cents under December last year. The only price change reported from this region was 1 cent per quart in home and store sales in Burlington, Vt. Producer prices in this market are not currently determined.

The average price paid for Class I milk in the Middle Atlantic States (early December) was \$6.56 cents per hundredweight -- 6 cents below November but 11 cents above December a year ago. No sizable changes were reported at either producer or consumer levels this month.

Milk for fluid use in the East North Central region averaged \$4.75 per hundredweight in early December. This was 1 cent higher than in November and 26 cents above December 1959. Columbus, Ohio reported a 17-cent Class I price increase but no change at consumer levels. In Dayton, Ohio, Class I prices were up 7 cents with slight increases in single quarts and half gallons out of stores. Toledo, Ohio reported a 3-cent increase in store quarts and a slight increase in home delivered quarts and store half gallons. Producer prices in this market are not currently determined. Evansville, Ind., prices paid by dealers were 10 cents per hundredweight higher with a 2-to-5-cent increase in half gallons out of stores. Class I prices dropped 19 cents per hundredweight in South Bend, Ind., but store quarts were up 1 cent on the low range for the only other change. Alton, Ill., Class I prices were 11 cents lower but home delivery prices 1 cent per quart higher than in November. Peoria, Ill., home delivery prices were unchanged but up and down adjustments at stores were reported. Producer prices in this market have not been reported. Springfield, Ill., fluid milk prices to producers and single quarts to homes were unchanged. Out of store quarts were down 1 cent but half gallons were slightly higher. Home delivery prices in Detroit and Grand Rapids, Mich., were the same as in November. Single quarts out of stores were 1 cent lower in Detroit with some increases in half gallons. A store price war was reported in Grand Rapids showing decreases as much as $4\frac{1}{2}$ cents per quart. Home delivery prices in this market were unchanged. Producer prices in these Michigan markets are not currently determined. The only price change reported in Eau Claire, Wis., was a substantial drop in half gallons out of stores as a result of a price war. Green Bay, Milwaukee and Superior, Wis., Class I prices were 11 cents lower with no change at consumer levels.

In the West North Central States, dealer prices for milk for fluid use averaged \$4.49 per hundredweight in early December. This was 5 cents less than November but 12 cents more than December last year. Duluth, Minn., reported a 11-cent per hundredweight decrease in fluid use producer prices but no change at consumer levels. The Class I price in Minneapolis and St. Paul, Minn., was 14 cents below November but consumer prices were unchanged. Burlington, Iowa reported a slight increase in store quarts but no changes at other levels. Des Moines, Iowa Class I prices declined 11 cents per hundredweight but home and store prices remained unchanged. St. Louis and Springfield, Mo., dealers' prices to producers declined 11 cents per hundredweight but consumer prices were the same as the previous month. Fargo-Moorhead, N.D.-Minn., reported a decline in the low range of single quarts and half gallons

out of stores. Producer prices in this market are not reported. In Wichita, Kan., Class I prices advanced 17 cents per hundredweight. Other reported prices were unchanged except for store quarts and gallons which varied from unchanged to 2 cents per quart lower.

South Atlantic area dealers' buying prices for fluid milk in early December averaged \$6.09 per hundredweight -- unchanged from both the previous month and the same month last year. Wheeling, W. Va., reported a 17-cent per hundredweight increase in Class I prices and about 1 cent per quart increase to consumers. Greenville, S. C., reported a 2-cent per quart decrease in store half gallons with all other prices steady. In Jacksonville, Fla., the only price changes reported were declines in half gallons and gallons out of stores.

In the East South Central region, fluid use milk prices averaged \$5.52 per hundredweight. This average was 1 cent per quart higher than November and 19 cents above December 1959. Knoxville reported a 19-cent increase in gallon jug prices following the close of a price war. All other prices were unchanged. The four Mississippi markets reporting gave an 11-cent increase in the Class I price. Greenwood and the Gulfport-Biloxi market consumer prices were about $1\frac{1}{2}$ cent per quart higher; Jackson prices increased 1 cent. Columbus home and store prices were not reported for November. Effective December 1, minimum prices for milk delivered to homes and sold out of stores were established in Miss. markets.

For the West South Central area markets reporting, Class I prices averaged \$5.72 per hundredweight. This was higher by 10 cents than November and 22 cents than December last year. Ft. Smith, Ark., Class I prices advanced 40 cents per hundredweight but consumer prices were unchanged. Baton Rouge, La., fluid use prices were 24 cents per hundredweight higher, with home and store prices up about 1 cent per quart. Class I prices in New Orleans were 11 cents higher, with consumer prices unchanged. Shreveport, La., Class I prices were 10 cents per hundredweight above November with home and store prices about 2 cents per quart higher. Tulsa, Okla., reported an increase of 46 cents per hundredweight in Class I prices with no change in consumer prices this month. Houston, Tex., reported a 3-cent decrease in the low range of half gallon prices out of stores with no change in other reported prices.

In the Mountain States, fluid milk prices paid by dealers averaged \$5.57 per hundredweight -- up by 4 cents from November and 14 cents from December a year ago. In Denver, Colo., half gallons out of stores sold for 1 cent less than in November. Other prices in this market were reported unchanged. In Phoenix and Tucson, Ariz., Class I prices advanced 13 cents per hundredweight. The only consumer price change reported in either of these markets was a 2-cent drop in store half gallons in Phoenix.

On the Pacific Coast, the dealers' average buying price for milk for fluid use in early December was \$5.45 per hundredweight. This was 1 cent above both the previous month and December 1959. Bremerton, Wash., reported increases of 28 cents per hundredweight for Class I milk and 1 cent per quart at homes and stores. Everett and Seattle, Wash., Class I prices advanced 10 cents per hundredweight. In Everett, home delivery prices were the same as in November while store prices increased as much as $2\frac{1}{2}$ cents per quart. Seattle prices to consumers were $1\frac{1}{2}$ cents per quart higher for all items reported. Fresno and San Francisco, Calif., Class I prices were unchanged but home and store prices were $\frac{1}{2}$ cent per quart higher.

Omaha, Nebr.....	21.4	23	24	24	25 cities average	24.5	26.1	26.7	26.8

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

S- Data from State sources. D.R.-Payment in direct ratio to milkfat. PA- Producers' association prices. 1/ Federal Order markets unless otherwise noted. 2/ Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. 3/ Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. 4/ FMCC Area I price for milk produced in Pennsylvania. 5/ Individual handler pool. Weighted average of handlers' prices. 6/ Negotiated prices paid members of principal producers' associations. 7/ Includes average quality premium paid on Class I milk. 8/ The following changes have been made for fall production fund: Added: Cincinnati 32¢; Columbus 45¢; Dayton-Springfield 48¢; Sub. St. Louis 8¢; Sioux City 33¢; St. Louis 16¢; Ozarks 17¢; Omaha-Lin.-C.B. and Platte Valley 35¢; Southwest Kansas 52¢; Louisville-Lexington 41¢. 9/ Association average blend price for the Omaha-Lincoln-Council Bluffs and Platte Valley markets together. 10/ Average of blend prices paid by all plants in the State. 12/ \$5.78-Shreveport; \$6.00 Ruston, Monroe & Bastrop. 14/ Tulsa Assn. FOM blend \$4.67, incl. prem \$4.93. 15/ Ardmore - Lawton only. 16/ September negotiated class I price - \$4.29.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, SEPTEMBER-OCTOBER 1960

Whole milk sales during October 3 percent below last year

Preliminary whole milk sales of 77.1 million pounds (average daily) in 65 Federal Order and 6 State marketing areas during October were about the same as September, but 3 percent less than October 1959. For the first 10 months of 1960, whole milk sales were about the same as for the same period last year.

September sales of skim milk items 7 percent above 1959

Sales of skim milk (average daily basis) during September in 69 marketing areas were 3 percent over August and 7 percent higher than September a year earlier. Of the 43 market groupings in the table, 33 showed increases from September last year. Sales were higher than September 1959 in 8 of the 10 largest groupings and these ranged from 1 percent in the Northern Ohio group to 23 percent in Minneapolis-St. Paul. Cumulative daily sales for the entire 69 markets for the first 9 months of 1959 were 6 percent more than the same period a year earlier.

Sales of half-and-half continue at 3 percent above previous year

Average daily sales of milk and cream mixtures (half-and-half) for September in 66 of these marketing areas were 2 percent above August and 3 percent higher than the same month in 1959. Sales in the two largest areas reporting, Chicago and California, which together account for about half of total sales, were 1 percent lower and unchanged, respectively, from September last year. The total for the remaining markets was 3 percent above August and 6 percent over September a year ago. Cumulative daily sales for the period January-September 1960 were 3 percent higher than 1959.

September fluid cream sales fractionally above 1959

Sales of fluid cream in average daily terms in 66 marketing areas during September were about the same as August and a fraction of a percent above September last year. Important markets reporting increases were Minneapolis-St. Paul, Puget Sound, and California; those reporting declines were Southern Michigan, St. Louis and Southeastern Florida. Average daily sales for all of the 66 markets for the first 9 months of the year were fractionally above the same period of 1959.

Total fluid product sales in September continue 1 percent over 1959

September average daily sales of all fluid items in pounds of product for 69 of the 71 areas were 9 percent greater than August and 1 percent over September a year earlier. For the first 9 months of 1960, average daily sales were 1 percent above 1959.

(Continued on page 27)

1/ Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas. Data reported in each comparison are for comparable areas. Previous year data revised, previous and current months preliminary. For a list of the markets combined in this table, see April 1960 report.

2/ Federal market totals less receipts from New Jersey producers as reported by the Office of Milk Industry.

3/ Data comprise plant receipts of Grade A milk from State producers.

Compiled from reports of Market Administrators and State milk control agencies.

(Continued from page 20)

October market receipts total 8 percent above last year

Average daily receipts of milk from producers in 74 Federal Order and 5 State marketing areas during October advanced 2 percent from September and were 8 percent higher than October a year earlier. Average daily receipts per producer at 627 pounds were 16 pounds higher than September and 56 pounds or 10 percent above October last year. Average milkfat test of receipts during October was 3.77 percent. This may be compared with the average test of 3.67 percent in September and 3.82 percent for October 1959.

Milk production in November 2 percent over November last year

Milk production on farms in the United States during November, at 9.0 billion pounds, was 2 percent more than November a year earlier and 9 percent above the November 1949-58 average. Mild weather contributed to the less than usual seasonal decline from October. Cumulative production for the first 11 months of the year was 116.1 billion pounds and may be compared with the 115.0 billion pounds for the same period last year. Per capita production for November was 1.67 pounds -- approximately the same as both the November 1959 and the 10-year average.
